

BINGO FOR CLIMATE CHANGE FOR ANNUAL MEETING

Process: Something is read, pause to digest and then answer and if on one's card they mark it with a pencil or pen or whatever they have. (sources CHANGE OUR 2morrow and Strategies for Lightening our Carbon Footprints as Best We Can)

1. Replacing one regular bulb with one of these which gives plenty of light reduces 100 lbs of CO₂ per year and 600 lbs. for replaced Christmas lights. ANSWER: LED lights
2. An energy source that comes from the compression of ancient plant and animal life formed over millions of years. ANSWER: Fossil Fuels
3. The insulating effect of atmospheric greenhouse gases that keeps the Earth's temperature warmer than it would be otherwise. ANSWER; Greenhouse Effect
4. Use of paper towels, napkins and other paper products are energy-intensive creating more greenhouse gases than cloth napkins (cotton, bamboo, etc.) ANSWER: Household Product
5. Using low-flow showerhead and reducing shower time to 5 minutes has a possible saving of 250-300 lbs of CO₂ per person per year. Heating water for 10 minutes can generate 4 lbs of CO₂
ANSWER: Bathing
6. The entire world resources are 1.6 earths; North America requires 3.9 earths in and of itself. North American households have approximately an output of 54,600 lbs. of CO₂ per year with the next highest, Germany, being half that amount. ANSWER: sustainability
7. Ways that climate change impacts PEOPLE (race, poverty, women, children, those in Global South, indigenous people, older generations, people with mental and physical disabilities, least developed countries) through social, economic and political power interacting with nature.
ANSWER: Intersectionality
8. Action to decrease the emissions of greenhouse gases in order to reduce the effects of global warming and climate change. ANSWER: Mitigation

9. Cold water clothes washing/full load saves 600 lbs of CO₂ per year; turning off faucet while doing dishes, brushing teeth, washing hands conserves potable water. A full load dishwasher reduces footprint by 100 lbs of CO₂ per year. ANSWER: Washing
10. This tool shows the temperature of your hot water from the faucet. To save up to 15% on water heating costs the water should be set to 120 degrees. ANSWER: Gauge
11. A colorless, odorless, non-poisonous gas that is a normal part of air and one of the six greenhouse gases that contributes to global warming. Fossil fuel combustion and deforestation have increased atmospheric concentrations by approximately 30% since the industrial revolution. ANSWER: Carbon Dioxide
12. This bulb contains gas-filled tubes and replaces standard incandescent lights, reducing energy by 75%. They can last 6-10 years. ANSWER: CFL (Compact Fluor. Lgt.)
13. A solid fossil fuel that is burned at high temperatures to produce energy, producing greenhouse gases. ANSWER: COAL
14. One full day a week without meat would save 350 lbs. of CO₂ per year. It takes 1800 gallons of water to produce one pound of meat. ANSWER: Meat consumption
15. Presently accounts for 4-9 % of the total climate change impact of human activities per passenger per mile. ANSWER: Air Travel
16. An action that can be accomplished through letter writing and affirmation of those concerned about climate change. ANSWER: Advocacy
17. A group whose Chapter commitment is attention to environment and all its intersecting injustices for women and children, those in poverty, global concerns, farmers, etc. ANSWER: Sisters of Providence
18. A SP group dedicated to love, mercy and justice that includes making changes toward care for Earth. ANSWER: SP Associates

19. An average increase in temperatures near the Earth's surface and in the lowest layer of the atmosphere. ANSWER: Global Warming
20. The heat or energy that is produced by natural processes (such as hot springs or reservoirs of hot water) inside the earth. ANSWER: Geothermal Energy
21. An ecological community together with its environment, functioning as a unit. ANSWER: Ecosystem
22. This gadget controls the temperature in a room. ANSWER: Thermostat
23. The energy harnessed when air swings turbines and conducts electricity through a generator. ANSWER: Wind Power
24. It is reported that a car's air conditioning reduces the car's fuel efficiency by this much. ANSWER: 10%
25. Reducing my use of plastics and recycling lowers this. ANSWER: Carbon Footprint
26. Less water is used is used in the production of this product than with common methods. ANSWER: Fair Trade and Organically grown coffee
27. Author of "The world is a sacrament of communion as a way of sharing with God and our neighbors on a global scale. Living our vocation to be protectors of God's handiwork is essential to a life of virtue." ANSWER: Pope Francis
28. These products are made from petroleum products and create more intense CO₂ in their production than natural fibers. ANSWER: synthetic/polyester

29. Any distinct change in measures of climate temperature, rainfall, snow, or wind-last for long periods (decades or longer). May result from natural factors and/or human activities.

ANSWER: Climate Change

30. A tool used to estimate your individual carbon footprint.

ANSWER: Carbon Calculator

31. Using this when plugging in multiple electronic devices and switch it off prevents electricity from being wasted.

ANSWER: Power Strip
